

## The Course

Las Ramblas golf course opened in 1991. Its design is the work of Pepe Gancedo who knew how to masterfully fit a golf course where few would have known it.

The golf course is built into a beautiful landscape of Mediterranean pines and natural ravines. It's holes and environment fascinates many players who see in this golf course a challenge for their game. Although not very long, its rugged landscape and beautiful trees gives much to this golf course.

The greens of Golf Las Ramblas are large and generous, fast and gentle slopes.

Golf Las Ramblas also has a modern Clubhouse and great practice facilities. With the driving range a very short walk from car park, making it ideal for going to practice any time.
